

## Measurement uncertainty for Analytical Laboratory methods

This document contains MU information for both NATA accredited and general methods performed in the Analytical laboratory. Uncertainties are ordered by NATA accredited methods (prefixed with LM), general methods (prefixed with GM) then by method number. Methods not listed in this document do not have an applicable MU.

**Measurement uncertainty (MU):** the uncertainty in the reported result.

**NATA accredited methods** – methods accredited to ISO/IEC 17025 (2017)
