Treatment and packaging requirements for each type of sample:

1. GRAPES

- Samples must be frozen at -18°C or lower for a minimum of 24 h prior to transport.
- All samples must be securely packed in a double ziplock bag to prevent leakage.
- All samples must be placed in a durable container with ice packs to keep cool and prevent damage in transit.
- Each sample must have a label affixed with a unique sample description or code.

2. JUICE

- Samples must be frozen at -18°C or lower for a minimum of 24 h prior to transport.
- Samples must be placed in a sealed unbreakable container and packed in a double ziplock bag.
- Samples must be placed in a durable container with ice packs to keep cool and prevent damage in transit.
- Each sample should have a label affixed with a unique sample description or code.

3. LEAVES/SHOOTS/CANES (for varietal ID only)

- Samples must be frozen at -18°C or lower for a minimum of 24 h.
- Samples must be securely packed in a double ziplock bag and shipped on **dry ice** to preserve their integrity. Please notify your courier in advance if you are using dry ice for transport. For alternative shipping options, please contact customer service.
- Each sample must have a label affixed with a unique sample description or code.

Transport requirements:

- A completed copy of this **Plant Material Movement and Declaration Form**, the **CA12 certificate** and any other required documentation (e.g. Phylloxera permit) must accompany the samples.
- **Please note:** Permits or certifications may be required by the **state of origin** to enable fruit to be moved out PIZ, and PRZ. Please contact the relevant branch or office of the local Dept of Primary Industries in your state to verify requirements. If a permit is required, it must accompany this consignment.
- An up-to-date outline of the Phylloxera management zones can be found on the following websites: [Vinehealth Australia](#) or [Agriculture Victoria](#)
- Samples must be transported via express courier or personal delivery as soon as possible, preferably early in the week, to prevent degradation.
- The outer container must have a label stating the package contains Quarantine Material and a brief description of the contents (e.g. frozen grapes).
- Details and accreditation number of the Affinity Labs (see attached CA12 certificate).
- Contact details of the sender.

Samples not meeting the above requirements may be quarantined and possibly destroyed without notice.

Samples (please tick the appropriate box):

1. Is a list of samples and sample descriptions attached? YES NO EMAILED
2. Are the samples packaged and labelled in accordance with CA12 requirements described in this form? YES NO

Declaration (for samples coming from PIZ, PRZ and PIBZ):

I declare the above samples have been frozen at -18°C or lower for a minimum of 24 hours prior to transport to the AWRI and comply with all the CA12 requirements specified in this form.

CONDITIONS

For the purposes of sections 6.3 and 6.4 of the CA12 (Laboratory Accreditation for the Importation of Grapevine, Soil and Plant Diagnostic Material Operational Procedure) this Certificate of Accreditation fulfils the requirement for an annual Plant Health Import Certificate for grapevine diagnostic material from a Phylloxera Infested Zone (PIZ), a Phylloxera Risk Zone (PRZ) or Phylloxera Exclusion Zone (PEZ).

The Accredited Person is accredited for the Certification Assurance Arrangement indicated above and must operate in full accordance with the requirements of the associated ICA/CA Operational Procedure.

The Accredited Person is responsible to ensure staff undertaking responsibilities required under this accreditation are adequately trained to do so.

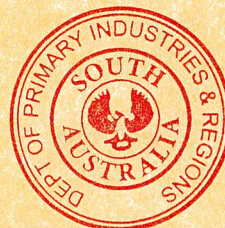

The Minister shall determine the frequency of audits required and authorise persons to conduct the audits.

The Minister shall set fees for audits and inspections and the cost shall be borne by the Accredited Person.

The Accredited Person shall prominently display this certificate at the accredited facility and return it to PIRSA on request or after cancellation of the accreditation.
